Watershed Plan Review & PIC Schedule

**Central
Lake Ontario
Conservation**

Everyone lives in a watershed.

Join us to share your vision for your local watershed at one of the PICs or complete the online survey at www.cloca.com.

Healthy Watersheds for Today and Tomorrow

Over...

From 2018 to 2020, Central Lake Ontario Conservation staff will be reviewing watershed plans for the Lynde, Oshawa, Black/Harmony/Farewell and Bowmanville/Soper Creek watersheds.

The goal of watershed planning is to sustain healthy natural systems that can respond positively to change like growth, new infrastructure and climate change. Watershed plans provide the framework to guide our decisions and actions to protect, restore and enhance natural resources to support healthy and resilient communities.

Public Information Centres (PIC)
